Pure Value Capital Fund S.C.A., SICAV-SIF A Cap - Quarterly Factsheet 31 March 2022

Valuation radar

The valuation radar shows the relative valuation of the Pure Value Capital portfolio on six valuation metrics (shown by the dark blue line) compared to the relative valuation of the median global stock (shown by the dark grey line). A score of 92 on the price-to-book ratio for example indicates that the average stock in the Pure Value Capital portfolio has a lower price-to-book ratio than 92% of all global stocks.

Pure Value Capital Fund S.C.A., SICAV-SIF A Cap - Quarterly Factsheet 31 March 2022

Investment strategy

The investment strategy focusses on companies that are cheap in the market and are characterized by strong fundamentals and stable historical business performance. The portfolio is oriented towards historically cheap stock markets and industries. All companies in the portfolio are cheap in terms of traditional valuation criteria such as price-to-book and price-to-earnings. Fundamentals are quantified in terms of traditional criteria such as solvency, liquidity and profitability. The portfolio is invariably invested in the three major geographic areas (America, Europe and Asia), is diversified across industries and is spread over large cap, mid cap and small cap companies. The weights of stock market indexes such as the MSCI World are not handled as benchmark. The equity portfolio consists of between 25 and 40 individual positions.
